Rotary lobe pumps

PREMIUMLOBE

THE INDIVIDUAL CUSTOMER SOLUTION

The innovative concept among the rotary lobe pumps for the premium market. Maximum hygiene, easiest handling as well as highest functionality and performance have been realized by partly using new design details.

- premium basic execution
- any kind of customized special solutions
- wide range of application and functionality
- simplicity and best reparability
- compliance with foodstuff directive CE1935/2004
- maximum pressures of 15 to 80 bar
- capacity up to 163 m³/h

iLOBE

SMALL PREMIUM EDITION

The modernity combined with economic efficiency and simplicity: The iLobe. New heating and sealing concepts are the particular strengths. The maximum differential pressure is 15 bars. Of course, the iLobe can be used for CIP/SIP applications without restrictions.

- patented integrated heat exchanger
- front loaded shaft seals
- particular suitability for chocolate and sugar products
- low acquisition cost and best reparability
- compliance with foodstuff directive CE1935/2004
- maximum pressures of 15 bar
- capacity up to 70 m³/h
