COMPETENCE &
PASSION FOR
PREMIUM PUMPS

Premium centrifugal pumps for low viscosity media

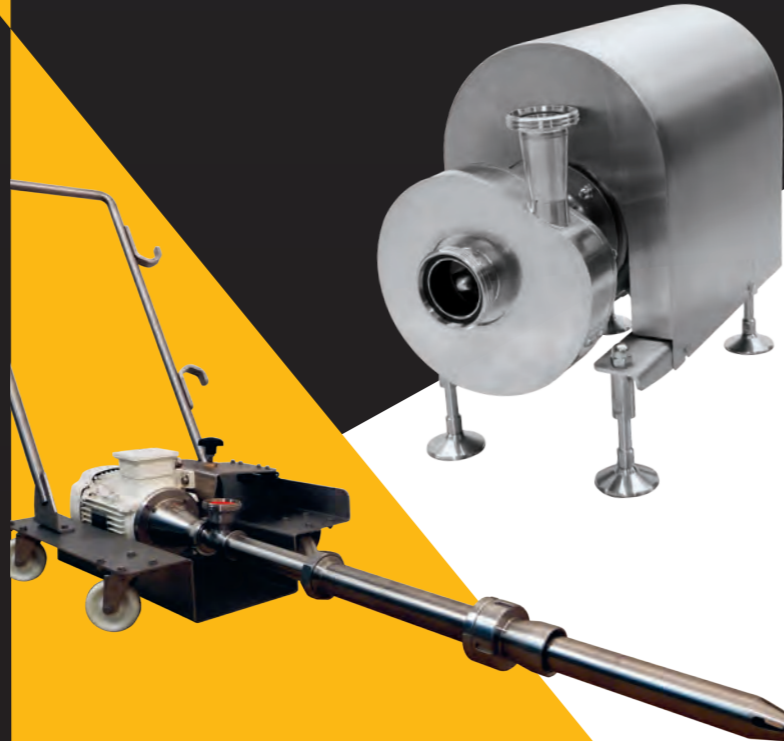

Aqueous centrifugal pumps offer robust and long-lasting operation in your applications. Ideally used as a product pump as well as a CIP and CIP return pump.

The modular design with FDA-compliant mechanical seals ensures maximum availability and extremely smooth running.

Premiumlobe & iLobe Rotary pumps

Rotary lobe pumps are the best solution for hygienic and non-hygienic processes.

The non-contact running avoids any product contamination due to abrasion. The special design allows for the most gentle product treatment and residue-free CIP cleaning.

Discharge pumps for Fluidbags and barrels

The FLB eccentric screw pumps in horizontal and vertical versions set a new standard in industrial hygiene.

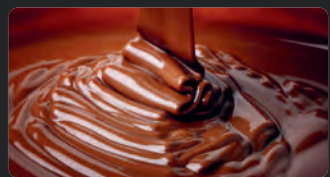

In combination with Fluidbags and for barrel emptying they are particularly suitable for the cosmetic, pharmaceutical and food industries.

You can find comprehensive product information on our website www.pump-products.de and feel free to contact us. We will develop the right solution for you!
